EDUCATION

UNIVERSITY OF DELAWARE | *GPA: 3.71* — Newark, DE
Bachelor of Arts & Sciences - Computer Science | Minor - Interactive Media Design — *December 2025*
Awards: Hatem M. Khalil Memorial Award

EXPERIENCE

TCGSPOT LLC — Mantua, NJ
Frontend Engineer — *July 2025 – March 2026*
- Designed and implemented frontend UI for a trading card mobile application using **Figma** and **Swift**
- Collaborated with a **cross-functional startup team** throughout the product development process, contributing to the design and development of a mobile platform
- Gathered requirements from **400+ potential end-users** to identify user needs and validate the application's features

SENSIFY LABS – UNIVERSITY OF DELAWARE — Newark, DE
Undergraduate Researcher — *September 2024 – December 2025*
- Contribute to DoveChat, an AI therapist application focused on supporting individuals with ADHD
- Created an **AI integration** framework using **OpenAI API**, translating research and product requirements into an initial AI-assisted application structure
- Applied iterative design methods to evaluate and refine AI-assisted user experiences throughout the development process

DELMARVA DIGITAL — Laurel, DE
Web Developer & Graphic Designer Intern — *June 2024 – August 2024*
- Researched, designed, implemented, and reviewed various tasks on multiple projects
- Gained hands-on experience with frontend development, creating **user-friendly interfaces** & meeting accessibility standards
- Reviewed and refined **client projects**, ensuring they met **usability and performance standards**

UNIVERSITY OF DELAWARE — Newark, DE
Seasonal Teaching Assistant – CISC 106, 108, 275, & 375 — *August 2023– December 2025*
- Provide academic and technical support to **100+ students per semester**
- Reinforce software development concepts by guiding students through coding assignments, debugging, and technical questions

PROJECTS

SoundMate
A full-stack social music-matching platform that calculates listener compatibility using Spotify profile data, supporting friend connections and event creation/joining.
***Used Technologies**: TypeScript, React, Cloudflare Workers, NestJS, Prisma, Supabase, Auth0, Spotify Developer API, Render*
***Role:** Team Member*

Department Discord Bot Calendar Feature
An interactive bot command that pulls Google Calendar events into a Discord message with a filter system. The app was developed following the Agile methodology.
***Used Technologies**: MongoDB, Google API, TypeScript*
***Role:** Project Manager*

AI Career Quiz Helper
An interactive career suggestion platform that generates AI-driven reports on industries, average salaries, and job positions. The app was developed following the Agile methodology.
***Used Technologies**: TypeScript, HTML/CSS, OpenAI API, React, React Native*
***Role:** Team Manager*

Eco Compass
An interactive recycling app that scans an item for recyclability, sorts the item, and finds the closest recycling center.
***Used Technologies**: Java, Kotlin, Google Maps API, Figma*
***Role:** Team Manager*

SKILLS

Languages/Tools: TypeScript, JavaScript, Python, Swift/SwiftUI, HTML/CSS, SQL, Git, GitHub, Figma, Framer, Canva, Microsoft Office, Google Suite, Adobe Suite, Visual Code Studio
Technologies: React, React Native, Bootstrap, REST APIs, MySQL, PostgreSQL, MongoDB, Data Analysis, Large Language Models, Agile Development, Design Thinking, Wireframing
Related Coursework: Human-Computer Interaction, Software Development, Web Technologies, DevOps, Databases, Data Structures, Systems Programming, Machine Organization & Assembly Language, Technical Writing
